Extra Info

If you have the Google Classroom App, you can take a picture when you click “+Add or Create” in the assignment.

If you don't have the app:

- 1) Click “+Add or Create” when viewing the assignment
- 2) Choose to create a Doc or Slide.
- 3) In the Doc or Slide, click “insert”, then “Image”, then “Camera” (at the bottom). This lets you use your computer's camera right in the Doc or Slide.

You may also take a picture with a phone or tablet, add it to Google Drive, and upload it to the assignment from there.

(For extra help, look at “ How to Add Photos to a Google Classroom Assignment” in “Classwork”. These videos show you how to take photos and upload them to assignments)

If you would like to create your design digitally, try using these apps:

<https://sketch.io/> (When you finish, click  to download your work. Save as jpeg or png)

[Tate Kids Paint](#) (When you finish, click  to download a picture of your work)

You may also choose to use a different program.
Make sure your work is original 😊
